SURYA

I am the joy of bathing
I am Surya Water Heater

SURYA

At Surya, 4 decades of unwavering customer trust help us in leveraging excellence in operations, manufacturing and business management. Our obsession with perfection finds expression in a relentless drive for improvement in processes, products, innovation which has helped us sustain growth and consistently introduce new products, including electrical home appliances such as Water Heaters.

All our home appliances, including Water Heaters use innovative technologies to make life easier for our customers. The Appliances are user-friendly and delight of every value-conscious homemaker.

Surya Water Heaters come with the assurance of durability, ability to withstand hard water, energy savings, pressure withstanding capacity and reliable safety features all backed by prompt and efficient after-sales service.

Our Water Heater range carries star ratings which help reduce electricity bills. These product offerings are backed by a reassuring warranty of 5-7 years on the inner tank and 2 year warranty on electrical components.

Surya Water Heaters. Get the best of efficiency, price, performance, elegance, design and innovation. Transform your bathing experience into sheer delight. Bring one home today.

SURYA WATER HEATERS HEATING INNOVATION

Vitreous Enamel Coated Tank (Glass Lined)

All models are equipped with the ultimate protection against rust and corrosion. The blue diamond layer provides several times resistance against corrosion as compared to standard inner tank designs.

Heavy Gauge Tank

Made by ultra thick super cold-rolled steel plate with 2mm thickness.

High Quality Incloy 800 Heating Element

Offers superior heating performance with extended life span and minimum energy losses. Compared to regular stainless steel heating element, it offers a stronger resistance to both acid and alkaline substance, also it has better longevity and better tolerance to rust and scale formation.

Triple Power Input

The TPI design is currently available in selected models with power input combinations I/II/III. helps to reduce electricity bill up to 75%

Multi Functional Safety Valve

For complete safety.

SURYA

Extra Heavy Duty Anode Rod

Ensures no scaling, thus enhancing life of the element and tank.

Energy Saving High Density Foam (PUF) Insulation

CFC free, complete protection design against radiant heat loss (up to 25mm thickness, 25% thicker than normal insulation design) .

Water Tubes with Whirlflow

The whirlflow ensures no immediate direct contact between cold & hot water for a faster heating and maximum energy saving effect.

Thermostat

Cuts off electrical power to guarantee safety and energy savings. Allows temperature setting between 25°C -75°C.

External Temperature Meter

Provides a clear temperature indication.

IPX4

Splash - proof from all sides, hence protection against water.

Qubo

Qubo

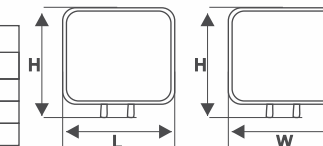

- ABS body
- ISI marked
- 5 star rating
- Thermal cutout
- Heavy gauge tank
- IPX4-splash proof
- Heating indicator light
- Multi-functional safety valve
- Enamel coated heating element
- Heavy duty anode rod for no scaling
- Vitreous enamel coated tank (Glass Lined)
- Energy saving high density foam (PUF) insulation
- 8 bar rated pressure suitable for high-rise buildings

SURYA

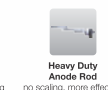

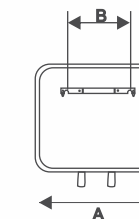

Glass Lined Series
